

Hi Dad,

Right now I am touring the one, and only Easter Island. The megaliths here at Easter Island are Interesting. If only you could come here. The megaliths are amazing!

Did you know that Easter Island has over 600 giant statues? Can you believe that these statues are 13 metres high and weigh about 27 tonnes? If your wondering where I am, Easter Island is located in the Pacific Ocean, 4000 km west of Chile. I wonder when the statues were made? They were probably carved over 2000 years ago. Well I have to go and see the megalith of Stonehenge, bye.

See you soon,

Norlando Naoe
